Portfolio: shivapreetham.vercel.app

Summary

Backend-focused Computer Science student (NIT Jamshedpur) with hands-on experience designing REST APIs, managing large-scale databases, and deploying real-time systems. Skilled in Node.js, Python, PostgreSQL, and MongoDB. Adept at shipping production-ready code, collaborating in fast-paced teams, and leveraging AI tools (Copilot, Gemini API) to accelerate development.

Education

National Institute of Technology Jamshedpur **Aug 2023 – Present**
B.Tech in Computer Science & Engineering — CGPA: 8.79 *Jamshedpur, Jharkhand*

Sri Chaitanya Nagarbhavi **2021 – 2023**
Class XII — 97.8%; JEE Mains — 99.3 Percentile *Bengaluru, Karnataka*

Work Experience

Official Web Team, NIT Jamshedpur — Engineered APIs and optimized backend for the institute website serving 6.8M+ users. Contributed 20+ production pull requests including performance improvements and database integrations.

Industry & Alumni Relations Cell — Web Lead — Built and deployed alumni portal with PostgreSQL backend and analytics dashboard. Coordinated a 6-member team to support 10,000+ alumni data records.

NSS NIT Jamshedpur — Developed backend modules for event registration and volunteer management in a 15+ member collaborative team.

Selected Projects

Code-Node: AI-Assisted Collaborative Code Editor 🌐 **Feb 2025**
– Built distributed WebSocket backend supporting sub-100ms collaboration latency.
– Designed scalable data storage with MongoDB and Dockerized deployment.
– Ranked **3rd** among 1,100+ teams at IIT BHU HaXplore Hackathon.

NIT-JSR Hub: Campus Companion Platform 🌐 **Apr 2025**
– Developed REST APIs and backend logic for attendance sync, class chat, and peer marketplace.
– Implemented **PostgreSQL schema** and optimized queries for fast updates.
– Scaled to 200+ active users with plugin-based integrations.

Ishara: Indian Sign-Language Recognition 🌐 **May 2025**
– Designed full ML pipeline with data ingestion, preprocessing, and API deployment for gesture recognition.
– Integrated **REST endpoints** to serve model predictions in real time.

Professor Portfolio: No-code Portfolio Builder 🌐 **Jan 2025**
– Built backend logic for user management and real-time previews using Cloudflare + PostgreSQL.
– Delivered production-ready MVP in 24 hrs; won 1st place at hackathon.

Technical Skills

Languages: Node.js, Python, Go, C++, Java

Backend: REST APIs, Microservices, WebSockets, Django, Express.js

Databases: PostgreSQL, MongoDB, MySQL

DevOps: Docker, Vercel, Cloudflare, Git, GitHub, Agile/SDLC

AI Tools: GitHub Copilot, Gemini API, AI-assisted debugging

Achievements

IIT BHU HaXplore Hackathon (Feb 2025) — 3rd Place out of 1,100+ teams.

Qualcomm Edge AI Hackathon (Jun 2025) — Top 10 Finalist among 1,700+ teams.

Web Team Hackathon, NIT Jamshedpur (Jan 2025) — 1st Place for Professor Portfolio Builder.
